

VISION FOR A PREFERRED FUTURE

The Strategic Plan for Gibault Catholic High School, while focusing on the next five years, establishes a vision that will extend into the next decade. The goals and strategies in this plan are designed to achieve this vision.

1. Gibault Catholic High School is a student-centered environment in which:
 - Students experience a distinctively Catholic education where they know and live their faith, think critically and globally, exercise leadership and serve others.
 - Students are challenged by a rigorous program of study which maximizes the potential of each individual as they prepare for post-secondary education and life-long learning.
 - Students learn to live and work in an increasingly diverse and technological community.
 - Students understand their responsibility to participate in community and parish activities.
2. Our leadership is faith-based, enthusiastic and collaborative.
3. We attract and retain a highly qualified and dedicated faculty and staff, and provide comprehensive professional development opportunities.
4. Our enrollment of approximately 300 students from diverse racial and socioeconomic backgrounds ensures each student an opportunity to fully participate in academic pursuits, co-curricular activities and to be valued and supported by peers and staff.
5. Campus facilities support current programs. A facility master plan provides direction for future educational needs.
6. Our school effectively utilizes and integrates current technology to support administrative, teaching and learning processes.
7. Effective strategic and financial planning, as well as comprehensive advancement and recruitment programs, ensures our future viability and provides affordability for students from diverse economic backgrounds.
8. Alumni of Gibault Catholic High School feel a close connection to the school as evidenced by their contributions of time and money and by the continued enrollment of legacy students.
